

December 1, 1964

Mr. Raymond W. Welpott
Executive Vice President
National Broadcasting Company
30 Rockefeller Plaza
New York 20, New York

Dear Mr. Welpott:

For some time New York University has been investigating the possibility of establishing an FM broadcast station to serve all of New York City. We are immediately faced with the problems of obtaining a suitable channel and appropriate transmission equipment.

As you may know, no channels are now available in the metropolitan area. We are therefore seeking assistance from organizations in the broadcasting industry. Possibly NBC might be agreeable to granting New York University its FM outlet in New York City. As you know, after August 1965 all FM stations in cities with a population larger than 100,000 will be required to broadcast separate programs under FM frequency fifty percent of the time.

The managers of our two radio stations and I would appreciate the opportunity of talking to you or a member of your staff about this suggestion. I shall telephone your office in the hope that an appointment can be arranged.

Sincerely yours,

Thomas P. Robinson
